SUMMARY

Frontend-focused software engineer with experience in React, TypeScript, and NextJS. Skilled in creating responsive, user-friendly web applications using modern JavaScript frameworks and libraries. Proficient in HTML, CSS, and TailwindCSS for crafting visually appealing interfaces. Familiar with backend technologies like Supabase and Node.js, open to full-stack opportunities. Strong problem-solving skills and ability to adapt quickly in fast-paced environments. Committed to continuous learning and staying updated with the latest web development trends. Seeking a challenging role to contribute technical skills and creativity to innovative projects.

SKILLS

FRONTEND	BACKEND	TOOLS & PLATFORMS	SOFT SKILLS

NextJS	Express	Netlify	Customer Service
TailwindCSS	PostgreSQL		Written Communication
HTML			Public Speaking
CSS			Stress Management
Remix			

PROJECTS

FAMILY RECIPES   July 2023 to Current
A fullstack digital version of a family recipe book, showcasing modern web development practices.
- Built with NextJS and TypeScript, leveraging server-side rendering for improved performance and SEO
- Implemented a responsive UI using shadcn-ui components and TailwindCSS for a sleek, user-friendly design
- Integrated Supabase services for robust backend functionality: Authentication for secure user access, Database for efficient recipe storage/retrieval, Storage for handling recipe images and attachments
- Ongoing development with focus on resolving complex state management issues and optimizing data fetching strategies

PORTFOLIO   July 2023 to Current
A creative redesign of a personal portfolio site, emulating a Windows 98 desktop experience
- Developed using NextJS and TypeScript, demonstrating proficiency in modern React development
- Crafted a unique, nostalgic user interface using shadcn-ui components and custom TailwindCSS styling
- Implemented interactive elements mimicking classic Windows features, showcasing attention to detail and creative problem-solving
- Optimized for performance and accessibility, ensuring a smooth user experience across devices

EMPLOYMENT

FREELANCE   2020 to Current
Web Developer   NYC, NY
- Designed and developed a production website for Luz Electric, a local electrical contracting business, improving their online presence and customer reach
- Created a mockup website for a content creator, demonstrating skills in modern web design and user experience
- Utilized technologies such as GatsbyJS, React, Bootstrap, and custom CSS to deliver responsive and performant web solutions

ZOU ZOU'S   Nov. 2022 to Feb. 2023
Line Cook   NYC, NY
- Worked as part of the culinary team in a high-pressure, fast paced environment
- Responsibilities included proper care and handling of food, inventory management and pre-service prep work

GENERAL ASSEMBLY   Mar. 2020 to Sept. 2020
Teaching Assistant   NYC, NY
- Worked across multiple cohorts of 25+ students each, reviewing and grading homework assignments spanning the full breadth of the GA Software Engineering Immersive curriculum
- Provided direct feedback to students where needed, answered pertinent questions and provided additional resources when requested

LUZ ELECTRIC AND CONTROL SYSTEMS INC.   2013 to 2018
Electrical Helper   NYC, NY
- Provided and assisted with new electrical installations, repairs and services at locations all throughout New York City
- Directly interfaced with customers to assist them in selecting the best possible products for their needs, in accordance with job requirements and trade regulations

UNITED STATES ARMY   2008 to 2012
Power Generator Equipment Repairer   Fort Bliss, TX & Osan Air Force Base, Osan, South Korea
- Provided maintenance and repairs for various diesel generators powering anti-air missile defense systems
- Troubleshot according to regulations and kept timely logs for all work performed
- Acted as the sole generator mechanic for various diesel generators powering anti-air missile defense systems
- Worked with and learned from both wheel mechanics and warrant officers to maintain and repair generators as needed
